Cod: 8736

360-litre static stainless steel fridge-freezer cabinet, -18 °C

Description

Freezer cabinet with a steel outer shell. ABS interior. Refrigerator models feature static plate cooling with a fan to ensure an even temperature; freezer models feature static cooling in the shelves. Digital thermostat for temperature control integrated into the door. Insulation: 4 cm for refrigerator models; 6 cm for freezer models. Defrosting in the fridge models takes place when the compressor is off, whilst in the freezer models it is manual. Automatic condensation water evaporation for fridge models. Interior with rounded corners to facilitate cleaning. Door lock with
key. Easily removable magnetic seal. Reversible door (an optional kit is required).

Dimensions

External dimensions	600x600x1855 mm
Internal dimensions	480x440x1620 mm
Packaging dimensions	680x650x2010 mm

Technical specifications

Capacity	360 Lt
Climate class	4
Electrical Power	0.15 kW
Frequency	50 Hz
Net weight	68 kg
Refrigerant gas	R600A
Temperature	-18 °C
Temperature/humidity	33 °C
Voltage	230 V
Weight including packaging	82 kg

Standard equipment

Included	6 fixed shelves, 480 x 415 mm, centre-to-centre distance 210 mm
