**Cod: 8284**

# Energy-efficient stainless steel refrigerated display cabinet with 4 doors, -2 to +8 °C, 223×60×85h cm

## Description

**Capacity, durability and quality**: **buy** a **refrigerated table** for restaurants from Ristoattrezzature and **serve ingredients that are always fresh**. Completing the décor of your restaurant with both style and functionality has never been easier.

**Let our company's experience and professionalism guide you**. We offer a range of products designed to guarantee high-quality performance and provide you with the support you need in your work.

With our **refrigerated table**, you can store all the ingredients needed to prepare your dishes correctly. **Ideal for patisseries, bakeries, pizzerias, restaurants, butchers, hotels** and any business that needs to keep food at low temperatures whilst minimising energy consumption.

The Ristoattrezzature **refrigerated worktop** comprises a worktop **surface**, **four hinged doors** housing four refrigerated compartments, a **built-in motor and adjustable feet**. Let's find out more about its features.

Design and operation

The **refrigerated worktop for restaurants features a minimalist design**. Its main characteristics are its clean, simple lines: aesthetically pleasing and ideal for any professional setting. The **choice of materials** is **of fundamental importance** for constant and intensive use.

Both**the** internal and external**structure** is made entirely **of stainless steel**: a durable and easy-to-clean material. **Adjustable steel feet** allow it to be easily adapted to everyone's needs, whilst the **self-closing doors** ensure better food preservation.

**Our refrigerated table measures 223 x 60 x 85h cm**, with insulation 6 cm thick. **It has a generous capacity of 390 litres**.

**The refrigeration system utilises the EBM forced-air cooling system**, which circulates cold air via a fan, enabling the fridge to quickly achieve a uniform temperature across every shelf.

You can easily set **the operating temperature between -2°C and +8°C**, and the table is also fitted with a digital thermostat utilising **Dixell technology**. This means you can electronically adjust and monitor the temperature whenever you wish.

The **Embraco tropicalised compressor (+43°C)** ensures our restaurant-grade refrigerated freezer table operates correctly even in conditions of very high humidity (up to 60 per cent).

Finally, it is fitted with a **corrosion-resistant evaporator** and features an **automatic defrost** system to ensure consistently high levels of performance.

Refrigerated table: cleaning and maintenance

**Regular cleaning and proper maintenance ensure that our table operates correctly and has a longer service life**.

The unit is constructed from stainless steel, and a damp cloth with a mild detergent is all that is needed to ensure the highest standards of hygiene.

**The internal corners are rounded** to simplify cleaning, and **the doors are fitted with magnetic seals**: these are easy to clean and replace.

The same applies to maintenance: **the motor compartment is easily accessible**, making any inspection or replacement work straightforward. Finally, **the manufacturer recommends periodically checking the defrosting function of the refrigerated table** to ensure it continues to operate correctly.

Why this is the right product for you

Choosing our **refrigerated counter** is **synonymous with reliability, quality and environmental responsibility**.

Ristoattrezzature offers a range of models in its catalogue to ensure maximum comfort for staff whilst optimising space.

The **refrigerated freezer table** is cooled using **R290 refrigerant gas, which offers excellent cooling properties, energy efficiency and environmental friendliness**. 100% natural.

**Excellent value for money**!

**Dimensions**

| | |
|---|---|
| External dimensions | 2230x600x850 mm |
| Grid dimensions | 330x455 mm |
| Insulation thickness | 60 mm |
| Internal dimensions | 1692x470x580 mm |
| Packaging dimensions | 2285x655x885 mm |

**Technical specifications**

| | |
|---|---|
| Capacity | 390 Lt |
| Compressor | Embraco EM2X3121U |
| Defrosting | air defrost |
| Electrical Power | 0.4 kW |
| Electricity consumption | 2.59 Kw/24h |
| Energy efficiency class | B |
| Frequency | 50 Hz |
| Maximum room temperature | 43 °C |
| Net weight | 133.2 kg |
| Operating temperature | -2 +8 °C |
| Refrigerant gas | R290 |
| Refrigeration | ventilated |
| Thermostat | Dixell/Carel |
| Voltage | 230 V |
| Weight including packaging | 163 kg |

**Standard equipment**

| | |
|---|---|
| Included | 1 Door grille |
