Cod: 9840036331783

Countertop heated display cabinet, 85.6 × 56.8 × 67h cm, curved glass on all four sides, 160 litres, +30 to +90 °C

Description

The countertop heated display cabinet is a useful piece of equipment for businesses that sell food products directly to customers to be served hot. Bakeries, sandwich shops, snack bars, supermarkets and restaurants can use heated display cabinets to keep ready-to-eat products at the correct temperatures.

Features of the heated display cabinet

This countertop heated display cabinet has a temperature range from +30°C to +90°C. The temperature can be adjusted using a convenient knob located at the rear of the unit.

The structure is made of stainless steel and metal, with four glass sides that enhance the display functionality of the cabinet. The front panel is curved, making it suitable for displaying food on the counter.

Access is facilitated by sliding rear doors, also made of glass. The interior is lit by LED lighting.

Capacity of the countertop heated display cabinet

This model of countertop heated display cabinet can accommodate up to three chrome-plated shelves (included as standard). The height is adjustable. The total capacity is 160 litres.

Safety instructions for using the catering heated display cabinet

Before switching on the display cabinet, fill the designated water tank and switch on the appliance using the switch located at the rear.

The shelves are removable for easy cleaning with kitchen detergent and a non-abrasive sponge.

Curved-glass heated display cabinet on Ristoattrezzature

Our catalogue features a wide variety of heated display cabinets for the catering industry, ideal for keeping items such as desserts, rotisserie dishes, sandwiches, piadinas and toast warm.
