Cod: 8232

Josper charcoal oven, model HJX25MBC, countertop version with a shelf for baking trays

Description

Josper elegantly combines the distinctive features of an oven and a grill in a single machine. Designed for the particularly demanding HORECA sector, Josper is equally popular with steak houses, restaurants specialising in charcoal-grilled meat, tapas bars, café-bistros, traditional restaurants, fine-dining establishments, etc. It runs on 100% cs of charcoal. Unique enclosed barbecue design. Various levels of charcoal cooking. Lightweight yet robust front door, easy to operate. Temperature control via a sophisticated draught system. What benefits does it offer and how does it stand out? Excellent results with any food: Its high operating temperatures allow food to be roasted and seared over the embers, preventing it from becoming overcooked. Top-quality charcoal cooking: It imparts the unmistakable flavour derived from the noble character of the wood and ensures a unique texture and juiciness. Faster cooking: It is 35% faster than an open grill. Dual oven and grill function: Two appliances in one. Lower charcoal consumption: It uses over 40% less charcoal than an open grill. Reduced flames: Thanks to the significant reduction in flames, it prevents food from drying out too much or burning. Improved working conditions: The chef is protected from constant heat exposure. Improved hygiene: Ash is collected in a hopper located in the enclosed cabinet beneath the cooking chamber. Personalised support: We have a worldwide network of official distributors and expert chefs, designed to facilitate commissioning, provide advice and offer after-sales services. Incredible Josper HJX25MBC countertop charcoal oven with a tray rack; heating-up time approximately 30 minutes.
