Cod: 2237

Tower-style Refrigerated Display Case

Description

Freestanding ventilated refrigerated display cabinet, made entirely of toughened glass. Exclusive design and 6 standard display levels, ensuring maximum visibility of the products on display. Featuring a robust construction of stainless steel and toughened glass, with a double-glazed front panel. 5 adjustable glass shelves (as standard) and 6 display levels. State-of-the-art LED lighting system, emitting cool light and ensuring minimal energy consumption. It is ideal for displaying starters, appetisers, sandwiches, tramezzini and food items for various dishes in cafés, pizzerias, sandwich bars, pubs, restaurants, delicatessens and patisseries. Built-in refrigeration unit concealed from the customer's view. Automatic defrosting. Operating temperature adjustable between +5° and +10°C. Temperature control via a digital thermostat with readout on the rear display. Sliding rear glass panels for loading the display cabinet. Colour: black. Power supply: 230V.
