Cod: 9230063011001

Stainless steel refrigerated cabinet with 1 glass door, 700 litres, -2 to +8 °C, ventilated, monobloc – FC

Description

The ventilated stainless steel single-door refrigerated cabinet from ristoattrezzature.com, with a gross capacity of 700 litres and a net capacity of 650 litres, features an external and internal structure made entirely of stainless steel. The cabinet is also height-adjustable thanks to its adjustable feet. The interior compartment features rounded corners to facilitate cleaning and thus ensure practicality and hygiene during use. The cooling system is ventilated, meaning that cold air is produced by an external evaporator with anti-corrosion-treated fins. The anti-corrosion treatment is designed to prevent oxidation that would otherwise occur as a result of frost or condensation forming during the refrigerator's normal operation. The cabinet features a door with a spring-return mechanism, key-operated lock, a door seal that can be removed without tools, an internal light, a base with rounded corners, and external base and rear panels made of galvanised sheet metal.

Dimensions

External dimensions	740x830x2010 mm
Internal dimensions	620x700x1396 mm
Packaging dimensions	765x855x2080 mm

Technical specifications

Capacity	650 Lt
Defrosting	electric defrost
Electrical Power	0.305 kW
Energy efficiency class	C
Frequency	50 Hz
Material	stainless steel
Maximum room temperature	35 °C
Net weight	125 kg
Operating temperature	-2 +8 °C
Power supply	Electric
Refrigerant gas	R290
Refrigeration	ventilated
Thermostat	electric
Voltage	230 V
Weight including packaging	139 kg

Standard equipment

Included	3 racks with pairs of rails
