Cod: 9235129012004

Stainless steel refrigerated freezer cabinet with 2 doors, 1200 litres, -18 to -22°C, static

Description

Why buy it?

This **professional freezer cabinet** is designed to ensure optimal food preservation, maintaining **stable temperatures** between **-18 and -22°C**. Made from **stainless steel**, it is robust, easy to clean and perfect for intensive use in professional kitchens, restaurants and food processing facilities. Thanks to its **static cooling system**, it maintains the quality of the products without temperature fluctuations, whilst the **self-closing doors** make it easy to use on a daily basis, preventing accidental opening.

Key features

Durable and hygienic construction

- **High-quality stainless steel**, ideal for professional environments thanks to its corrosion resistance and ease of cleaning.
- **Anti-corrosion treatment**, which protects the material and ensures a long service life even in damp environments or where temperatures fluctuate.

Large storage capacity

- With a **capacity of 1,200 litres**, it allows for the storage of a large quantity of frozen products, making it ideal for businesses with high storage volumes.
- **6 shelves with pairs of guides supplied**, to optimise the use of internal space and facilitate access to products.

Efficient refrigeration performance

- **Static refrigeration system**, ideal for maintaining a constant temperature without excessive dehydration of food.
- **R290 refrigerant gas**, which is environmentally friendly and efficient, reducing energy consumption and environmental impact.

Maximum convenience and safety of use

- **Doors with spring-return mechanisms**, which close automatically to ensure maximum energy efficiency at all times.
- **Internal lighting**, for optimum visibility even in dimly lit environments.
- **Adjustable feet**, allowing the cabinet to be adapted to different surfaces, ensuring stability and safety.

Energy efficiency and temperature control

- **Electronic thermostat**, allowing precise temperature control between **-18 and -22°C**, adapting to storage requirements.
- **Maximum ambient temperature of 35°C**, ensuring optimal operation even in kitchens and environments with high temperatures.
- **Energy class D**, offering low energy consumption relative to its performance.

Technical specifications

External dimensions: 134 x 81 x 201 (h) cm
Net weight: 174 kg
Power supply: 230V / 50Hz
Power consumption: 0.602 kW
Cooling: Static
Refrigerant: R290

Dimensions

External dimensions	1340x810x2010 mm
Internal dimensions	1220x680x1390 mm
Packaging dimensions	1370x840x2090 mm

Technical specifications

Capacity	1200 Lt
Defrosting	manual
Electrical Power	0.602 kW
Energy efficiency class	D
Frequency	50 Hz
Material	stainless steel
Maximum room temperature	35 °C
Net weight	174 kg
Operating temperature	-18 -22 °C
Power supply	Electric
Refrigerant gas	R290
Refrigeration	ventilated
Thermostat	electric
Voltage	230 V
Weight including packaging	183 kg

Standard equipment

Included	6 grids with pairs of rails
