Cod: 9231063012001

Stainless steel refrigerated freezer cabinet with 1 glass door, 700 litres, -18 to -22°C, ventilated, monobloc – FC

Description

The ventilated freezer cabinet from ristoattrezzature.com, made of stainless steel with a single door, has a gross capacity of 700 litres and a net capacity of 650 litres; its external and internal structure is made entirely of stainless steel. The freezer is also height-adjustable thanks to its adjustable feet. The interior features rounded corners to facilitate cleaning, thereby ensuring practicality and hygiene during use. The cooling system is ventilated, meaning the cold is generated by an external evaporator with anti-corrosion-treated fins. The anti-corrosion treatment is designed to prevent oxidation that would otherwise occur as a result of frost/condensation forming during normal operation of the freezer. The cabinet features a door with a spring-return mechanism, key-operated lock, a door seal that can be removed without tools, an internal light, a base with rounded corners, and external base and rear panels made of galvanised sheet metal.

Dimensions

External dimensions	740x830x2010 mm
Internal dimensions	620x700x1396 mm
Packaging dimensions	765x855x2080 mm

Technical specifications

Capacity	650 Lt
Defrosting	electric defrost
Electrical Power	0.520 kW
Energy efficiency class	And
Frequency	50 Hz
Material	stainless steel
Maximum room temperature	35 °C
Net weight	140 kg
Operating temperature	-18 -22 °C
Power supply	Electric
Refrigerant gas	R290
Refrigeration	ventilated
Thermostat	electric
Voltage	230 V
Weight including packaging	154 kg

Standard equipment

Included	3 racks with pairs of rails
