Cod: 10373235023033

Countertop heated display unit, 55.4 × 37.6 × 37.6 (h) cm, curved glass, 45 litres, +30 to +90 °C

Description

You can keep your dishes warm in an elegant, functionally designed display cabinet with Ristoattrezzature. Serve only fragrant baked goods by purchasing**the countertop heated display cabinet** with curved glass from our website.

You'll have a high-quality, high-performance product, ideal for offering your customers only the very best, always at the right temperature.

The heated countertop display case is, in fact, essential in **delicatessens, rotisseries and cafés**, and ensures the quality of your dishes remains intact.

Design and operation

The Ristoattrezzature **heated countertop display case** measures **55.4 x 37.6 x 37.6h cm** and features an elegant, minimalist design thanks to its curved glass panels.

Completely transparent, the display cabinet offers a full view of the food, ensuring an inviting presentation for customers.

Made from stainless steel and glass, it ensures **durability** and **excellent performance**, making it ideal for keeping **sandwiches, mini pizzas, fried and cooked foods** warm.

Inside **,** it is **fitted with one fixed, non-adjustable chrome-plated rack and one intermediate rack**, whilst access is via a **double hinged door located on the user side**.

The maximum capacity of this display unit is **45 litres**, whilst the **operating temperature** is adjustable between **+30 and +90 °C**.

The temperature can be set using a knob located at the rear, alongside the ON/OFF switch.

It is electrically powered with a power rating of 0.80 kW.

Cleaning and maintenance

The heated display cabinet must be thoroughly **cleaned every day**. Croissants and mini pizzas constantly leave crumbs which can burn and cause unpleasant odours.

To facilitate these tasks, **the display cabinet is fitted with an** easily removable and sanitiseable **crumb tray**. **The support racks and glass shelf are** also **removable**.

When cleaning these surfaces, do not use corrosive detergents that may scratch the stainless steel surface; a damp cloth and a mild degreasing detergent are sufficient.

Why this is the right product for you

High-quality, professional display units, specifically designed to ensure maximum hygiene and cleanliness, are far more **reassuring for customers**. Seeing a tidy display counter with food items well protected from external factors conveys **a sense of safety and professionalism**.

Serving croissants or mini pizzas at the perfect temperature, without having to reheat them in the microwave, allows you to offer **a more fragrant product**. Furthermore,**the countertop heated display case** is a functional display unit which, unlike other heating systems, **provides uniform heat**. This means you can keep the temperature of your dishes constant at all times.

This countertop model also allows you to **place it** easily **on the counter**; it is **practical and convenient**. Move it around effortlessly to suit your needs, whilst the support feet provide excellent stability.

Its **versatility** means it can accommodate a variety of dishes: from hot deli dishes to mini pizzas and fast-food sandwiches. **Ideal for use in any catering setting**.
