Cod: 983600203632

Countertop refrigerated display cabinet, 88 × 56.8 × 68.6h cm, with straight glass on all four sides, black glass, 160 litres, 0 +12 °C

Description

An essential item on your counter, the **countertop refrigerated display cabinet** is a vital piece of equipment. Useful for ensuring your dishes are always served to customers at the right temperature, it fits easily onto a worktop or counter and makes serving easier.

You can store sweet and savoury dishes inside, preserving the quality of the ingredients whatever the outside temperature.

Featuring a double shelf, this model is **black** in **colour with straight glass panels**.

Design and operation

Elegant and minimalist, the modern design of **the 160-litre countertop refrigerated display case** suits any interior setting. Its square lines allow it to be easily positioned in the dining area, where it offers a 360° view of the products inside.

The **tempered glass** used ensures **excellent thermal insulation** with **minimal energy loss**.

The structure is made of high-gloss stainless steel, capable of withstanding the demanding pace of the catering industry. **The steel is resistant to scratches and stains**, is highly hygienic and easy to clean, and lends a professional touch to the unit.

Inside, **the display cabinet is fitted with cool LED lighting** to improve product visibility without increasing energy consumption or causing the products to overheat.

Access to the countertop refrigerated display cabinet for the catering industry is provided via **sliding rear doors**, which allow for quick and practical use.

Inside **,** you'll find two **removable and adjustable shelves, lined with PVC**. One measures **80x32 cm** and the other **80x35 cm**. The **feet underneath are** also **height-adjustable** to suit your working requirements.

The display cabinet is electrically powered at a **voltage of 230 V** and a **power rating of 0.16 kW**. The operating temperature is adjustable between **0** and **+12 °C** via a **digital thermostat**. The **compressor is built-in** and extremely quiet.

The overall dimensions of the countertop refrigerated display cabinet are **88 x 56.8 x 68.6h cm,** with a **gross weight of 70 kg**

Cleaning and maintenance

The professional countertop refrigerated display cabinet is fitted with **an automatic defrost** system, a feature that reduces cleaning and maintenance times.

The automatic condensate evaporator also helps to control any condensation that may form inside, ensuring the unit remains clean and hygienic at all times.

To clean the unit thoroughly, remove the included shelves and wash them with a degreasing solution.

For the tempered glass, you can use water and vinegar, applying it with a soft cloth and taking care not to leave streaks. Finally, **a mild soap and a soft cloth** will restore the shine to the stainless steel parts.

Sanitising should be carried out periodically, whilst food residues should be removed daily to ensure the machine always operates at peak efficiency.

Why this is the right product for you

A compact, streamlined design, compact dimensions and maximum display capacity make this display cabinet an essential piece of professional catering equipment.

Temperature control and glass on all four sides enable the refrigerated display cabinet to offer a comprehensive service to customers. The product is clearly visible and retains all its organoleptic properties.

Choose it for its sustainability too: the 160-litre refrigerated display cabinet is an **energy-class B** appliance, consuming just **1,038 kWh per year**, ensuring savings on your energy bill and respect for the environment.

The refrigerant used in the display cabinet is **R290**, a **100% natural** substance that does not damage the ozone layer whilst offering excellent thermodynamic performance.

Finally, **the refrigeration system is of the ventilated type**: an evaporator located outside the chamber distributes the cold air evenly.

Dimensions

External dimensions	880x568x686 mm
Packaging dimensions	935x620x720 mm

Technical specifications

Capacity	160 Lt
Defrosting	automatic
Electrical Power	0.16 kW
Energy efficiency class	B
Frequency	50 Hz
Net weight	66 kg
Operating temperature	0 +12 °C
Power supply	Electric
Refrigerant gas	R290
Refrigeration	ventilated
Voltage	230 V
Weight including packaging	70 kg

Standard equipment

Included	LED interior light and 2 removable, adjustable plastic-coated racks (800x320mm, 800x350mm)
