Cod: 106330182722

4-zone electric induction hob with open compartment, 28 kW, 80×90×85h cm

Description

Stainless steel body. Heat-resistant knobs with functional screen-printed markings on the rim. Black glass-ceramic hob, 0.6 cm thick. Square radiant heating zones measuring 27x27 cm, mounted beneath the glass and controlled by a 9-level power potentiometer. Continuous adjustment of heating power. Under-glass display showing the set power level and any error messages. Protection provided by an over-temperature sensor in the event of dry operation. Pot detection sensor. Sensor for detecting pans with a diameter of less than 12 cm. Worktop in AISI 304 stainless steel, 20/10 thick, with wide-radius rounded edges for easy cleaning. Front cladding in stainless steel. Compatible with any type of cookware suitable for induction cooking: cast iron, iron or other ferromagnetic materials. Consistent energy efficiency, even when using cookware of different shapes. Significant time and energy savings thanks to cooking times and energy consumption halved compared to traditional cooking systems. Improved working environment thanks to reduced heat loss. Greater safety for the user: only the cookware is heated whilst the worktop remains cool. The risk of burns is therefore significantly reduced. The worktop features a laser-cut finish to ensure a ‘head-to-head’ fit between worktops and a secure fixing of them to one another. Height-adjustable stainless steel feet.

. 100% Made in Italy.

Dimensions

External dimensions	800x900x850 mm

Technical specifications

Electrical Power	28 kW
Net weight	75 kg
Power supply	Electric
Voltage	400 V
