Cod: 111860031602836

Electric cooker with 6 hotplates and a 15 kW oven, 90×60×85h cm

Description

Electric cooker with 6 hotplates and an oven, stainless steel body. Heat-resistant knobs with functional screen-printed markings on the rim. Moulded, double-walled oven door and contoured handle with an elliptical cross-section made from AISI 304 stainless steel.

Heating is provided by round cast-iron electric hotplates. The heating element is fixed to the base of the hotplate, embedded in a layer of insulating material. Each hotplate is fitted with a switch that allows the power to be adjusted from maximum to minimum across seven settings. Safety is ensured by a temperature limiter located inside the hotplate.

The worktop is made of pressed AISI 304 stainless steel and features an inverted counter-embossing to ensure the plates fit perfectly, facilitate cleaning and protect the electrical components from spilled liquids. The front panel is made of AISI 304 stainless steel.

1/1 GN static electric oven with open chamber. Oven chamber made of AISI 430 stainless steel and a thick stainless steel base. Removable stainless steel oven rack.

Insulation of the cooking chamber and oven door is provided by a layer of high-temperature-resistant ceramic fibre.

Heating is provided by heating elements positioned beneath the base and in the ceiling of the cooking chamber. The oven temperature can be adjusted between 90°C and 300°C using a thermostat. The oven can be operated with heating from below only, from above only, or with both heating elements operating simultaneously, using a selector switch.

Laser-cut worktop finish to ensure a ‘head-to-head’ fit between worktops and secure fastening of the worktops to one another.

Height-adjustable stainless steel feet.

. 100% Made in Italy.

Dimensions

External dimensions	900x600x850 mm

Technical specifications

Electrical Power	15 kW
Net weight	80 kg
Power supply	Electric
Voltage	400 V

Standard equipment

Included	1 oven rack
