Cod: 100290060401981

Professional electric countertop fry top with 1/2 smooth and 1/2 ribbed cooking surface, 3 kW, 55×45×23h cm

Description

The professional electric countertop fry top for restaurants is a piece of equipment designed for grilling vegetables, meat and fish. The**fry top**, with its **stainless steel construction** and **large cooking surface**, is a professional-grade grill that can be mounted on virtually any worktop.

Use it for your grilled specialities and bring out the best in your recipes, relying on its perfect cooking performance.

Design and operation

The design of our **professional electric countertop Fry Top grill** is compact and streamlined. Its **compact dimensions of 55 x 45 x 23h cm** mean it can be easily fitted into any workspace.
Half of the **cooking surface is smooth and half is ribbed**, giving you the option to choose between two cooking styles.

The grids measure 54.8 x 35 x 0.8h cm, with non-slip edges on all sides. This design allows you to cook grilled dishes to perfection and channel the fat into the designated hole.

The fat that melts during cooking flows into a drip tray and then into **the grease-collection drawer** below. The drawer is **removable** and can be cleaned easily.

Food is cooked using the smooth and ribbed griddle plate positioned above the burners, which ensure a high temperature. The **griddle plate is controlled by a thermostat**: select the desired setting using the knob at the front. **Temperature control is automatic. An indicator light signals the end of cooking**.

It is electrically powered; the **Frytop professional electric countertop grill** is, in fact, **fitted with a Schuko plug with a power rating of 3 kW** at a voltage of 230 V.

It weighs just 17 kg in total, making it a truly practical piece of kitchen equipment.

Cleaning and maintenance

Regular cleaning of the cooking plate is essential to ensure optimum performance. **Never use cleaning products containing: sand, caustic soda, acids or chlorides, as** these **will damage the surface**. **The Frytop professional electric countertop grill** should be cleaned using a **damp cloth with a non-abrasive detergent** and the surfaces dried with a dry cloth.

Easy to use and clean, this electric grill is particularly convenient and versatile, whether in a professional kitchen or at home. Even **the front drawer**, which collects cooking residues, **is easy to remove and sanitise**.

Why this is the right product for you

Ristoattrezzature electric grills comply with all industry standards: EN 55014-1: 2006+A1: 2009+A2: 2011; EN 61000-3-2: 2014; EN 61000-3-3:2013; EN 55014-2:2015.

By purchasing **a professional Frytop countertop electric grill**, you'll be bringing a 100% safe, high-quality product into your professional kitchen. You'll be able to cook your dishes with or without oil, achieving perfect results **without producing all the smoke associated with traditional grills**.

What's more, one of the advantages of buying **a professional Frytop electric grill for restaurants** online is its versatility. **Its compact size and light weight also make it suitable for domestic use**. The handy rubber feet adapt to any surface, ensuring maximum stability.
