Cod: 107500040122561

4-door stainless steel refrigerated freezer table with remote motor, -18 to -22°C, 210×70×84h cm

Description

GASTRONOMIA refrigerated counter with 4 doors, low temperature, designed for a remote refrigeration unit, with exterior and interior panels made from AISI 304 stainless steel and an exterior base made from galvanised steel; it features rounded internal corners to facilitate cleaning of the chamber. Cold retention and performance are maximised thanks to 6 cm thick, CFC-free, high-pressure injected polyurethane insulation. The doors are fitted with spring-return closures and magnetic seals to ensure a perfect seal and a significant reduction in energy wastage. Thanks to the convenient display on the front of the refrigerated counter, you can monitor the temperature at all times, ensuring the correct storage conditions for your food are maintained. Furthermore, the forced-air cooling system maintains a constant temperature inside the counter. It is also fitted with an automatic defrosting and condensate evaporation system, which allows liquids to be drained away without the need for manual intervention. The refrigerant that can be used is R452A, which is readily available from any refrigeration specialist.

. 100% Made in Italy.

Dimensions

External dimensions	2100x700x840 mm
Insulation thickness	60 mm
Packaging dimensions	2150x740x1000 mm

Technical specifications

Amperage	1.5 A
Capacity	608 Lt
Defrosting	automatic
Electrical Power	0.48 kW
Frequency	50 Hz
Net capacity	420 Lt
Net weight	116 kg
Operating temperature	-18 -22 °C
Power supply	Electric
Refrigerant gas	R452A
Refrigeration	ventilated
Voltage	220 V, 240 V

Standard equipment

Included	1 GN 1/1 plastic-coated rack per door, 1 pair of stainless steel ‘L’-shaped runners per door and an insulated base shelf
