Cod: 119680020142233

4-zone induction hob with a 14 kW compartment, 80 × 70 × 90 (h) cm

Description

Why buy it?

If you run a professional kitchen and want to combine **high performance**, **precise temperature control** and **optimised energy consumption**, this induction hob is the one for you. Thanks to its 4 independent hotplates and 14 power settings, it allows for fast, even cooking that can be adjusted down to the finest detail. What's more, the storage compartment underneath provides handy extra space, which is always useful for organising your kitchen workflow.

Key features

- **High-performance induction technology**
  The hobs use magnetic induction to transfer heat directly to the cookware, minimising heat loss. This means **fast cooking**, greater safety and **remarkable energy efficiency**. No overheating of the hob surface, lower energy consumption and maximum precision.
- **14 power levels for each hob**
  Each cooking zone is adjustable across **14 power levels**, to adapt perfectly to every type of preparation, from gentle simmering to more intense cooking. The result? **Total control over the cooking process**.
- **4 independent heating elements: one zone, one power setting**
  Unlike other models that share power, this hob is fitted with **separate heating elements for each cooking zone**. This means you can use **all four zones simultaneously**, without compromising on efficiency or performance.
- **Significant energy savings**
  Thanks to induction technology and the independent control of the hobs, **significant energy savings** are achieved, with less wastage and greater efficiency. An ideal solution for those looking to reduce the running costs of their business.
- **Compact design with integrated storage compartment**
  Its **compact dimensions** (80x70x90h cm) make this cooker perfect even for limited spaces, whilst the **storage compartment underneath** is ideal for storing utensils, containers or ingredients, optimising kitchen organisation.

Technical specifications

- Power**supply:** Electric
- **Total power:** 14 kW (3.5 kW per hob)
- **Voltage:** 400 V
- **Frequency:** 50 Hz
- **External dimensions:** 80x70x90h cm

Dimensions

External dimensions	800x700x900 mm

Technical specifications

Electrical Power	14 kW
Net weight	40 kg
Power supply	Electric
