Cod: 111890021242842

4 kW countertop gas fry top with ribbed griddle, 30×60×28h cm

Description

Countertop gas fry top, ribbed griddle, stainless steel body. Knobs made from thermosetting plastic.

Rapid temperature rise and heat retention are achieved thanks to a high-efficiency stabilised-flame burner, suitable for operation at high temperatures. Ignition via a spark ignition system powered by 230V single-phase electricity plus neutral.

Thick cooking surface with rounded edges and a welded, sealedsplash guard to ensure easy cleaning. The griddle is sloped and directed towards the grease drain hole, which is connected to a container situated beneath the cooking surface. Equipped as standard with a grease collection drawer.

Fitted with a safety gas tap that allows the flame to be adjusted from maximum to minimum and enables the frytop to reach 300°C. Safety is ensured by a thermocouple activated by the burner flame.

The worktop finish features laser-cut edges to ensure a ‘head-to-head’ fit between worktops and secure fastening of the worktops to one another.

Tested with natural gas or LPG depending on the user’s requirements.

. 100% Made in Italy.

Dimensions

External dimensions	300x600x280 mm

Technical specifications

Electrical Power	0.10 kW
Gas Power	4 kW
Net weight	21 kg
Operating temperature	+50 +300 °C
Power supply	Gas
