Cod: 12613

Stainless steel sink with cabinet, 160×70×95h cm, 2 bowls with left-hand drainer, VS new, transport damage

Description

Why buy it?

Choosing a **stainless steel sink with a cabinet** means investing in a product that combines **durability, ease of use and compliance with hygiene standards**. It is designed to meet the needs of professional kitchens, ensuring a practical and safe experience.

Key features

- **Maximum hygiene and ease of cleaning:** made from **a combination of AISI 201 and 304 stainless steel** with a Scotch Brite finish, this sink is corrosion-resistant and features smooth, easy-to-clean surfaces, perfect for professional environments.
- **Practical design**: The side drainer provides a convenient area for drying utensils or placing food without taking up space inside the bowl. Ideal for optimising daily operations.
- **Sturdy and adjustable structure**: The **adjustable feet** allow you to adapt the sink perfectly to your worktop, ensuring stability even on surfaces that are not perfectly level.
- **Protection and safety**: The base panel and raised edges protect the surrounding area from water splashes, keeping the environment drier and safer.
- **Compliance with standards**: Manufactured to strict hygiene standards, it is the perfect choice for those working in environments where cleanliness and safety are paramount.

Technical specifications
