Electric Convection Oven with Grill and Humidification, for 4 1/1 GN trays / racks

Description

Electric fan-assisted convection oven with grill and humidification function; its electric grilling function is a simple and healthy cooking method that allows you to cook, without fat, all those foods that are usually grilled: kebabs, cutlets, chopped vegetables and even sausages, bacon and spare ribs. This oven also makes it easier to prepare recipes that involve browning
: potato bakes, timbales, semolina au gratin or Roman-style gnocchi. The motor’s high heating power and the GRILL function (which is always fan-assisted) reduce cooking times whilst enhancing the browning and aroma of the food without overcooking it.

Dimensions

External dimensions	784x752x634 mm

Technical specifications

Cooking method	ventilated
Electrical Power	5.2 kW
Engines	unidirectional
Frequency	60 Hz
Humidification	indirect push-button control
Net weight	52 kg
Operating temperature	+50 +300 °C
Power supply	Electric
Voltage	400 V
