Cod: 111900011512935

Electric countertop fry top with smooth griddle, 6.5 kW, 40×90×25h cm

Description

Stainless steel frame. Heat-resistant thermoset plastic handles with practical screen-printed markings.

Heating is provided by tubular heating elements with stainless steel sheaths placed in direct contact with the cooking plate. Temperature control via a thermostat. Operating temperatures ranging from 90°C to 300°C. Manually resettable safety thermostat to protect against equipment malfunctions.

A single, wide and very thick cooking plate with a smooth finish that ensures excellent heat transfer. Welded splash guard. The cooking plate is installed on the worktop at a slight angle to allow fats to drain towards the outlet.

Smooth cooking plate.

AISI 304 stainless steel worktop with rounded corners for easy cleaning. Front, side and rear panels in stainless steel.

Large opening in the hob for draining grease into a large-capacity container situated beneath the hob itself. Fitted as standard with a grease collection container.

The worktop finish is laser-cut for a ‘butt-joint’ fit and secured with edging.

. 100% Made in Italy.

Dimensions

External dimensions	400x900x250 mm

Technical specifications

Electrical Power	6.5 kW
Net weight	54 kg
Power supply	Electric
Voltage	400 V
