Cod: 112220052062016

Electric cooker with 4 round hotplates and an electric oven, 15.8 kW, 80×70×85h cm

Description

Stainless steel structure. Handles made from heat-resistant material with functional screen-printing on the rim. Moulded, double-walled oven door and a contoured, elliptical-section handle made from AISI 304. Heating is provided by round cast-iron electric heating plates. The heating element is fixed to the base of the plate, embedded in a layer of insulating material. Each plate is fitted with a switch allowing the power to be adjusted from maximum to minimum across seven settings. Safety is ensured by a temperature limiter located inside the plate. The worktop is made of pressed AISI 304 stainless steel and features a reverse deep-drawn edge to ensure the plates fit perfectly, facilitate cleaning and protect the electrical components from spilled liquids. Front cladding in AISI 304 stainless steel. 2/1 GN static electric oven sized to accommodate 2/1 GN trays. Oven chamber in AISI 430 stainless steel and base in heavy-gauge stainless steel. Removable stainless steel oven rack. Insulation of the cooking chamber and oven door is provided by a layer of high-temperature-resistant ceramic fibre. Heating is provided by heating elements positioned beneath the base and in the ceiling of the cooking chamber. Oven temperature adjustable between 90°C and 300°C via a thermostat. The oven can be operated with heating from below only, from above only, or with both heating elements active, using a selector switch. Laser-cut worktop finish to ensure a ‘head-to-head’ fit between worktops and secure fastening of the worktops to one another. Height-adjustable stainless steel feet.

. 100% Made in Italy.

Dimensions

External dimensions	800x700x850 mm

Technical specifications

Electrical Power	15.8 kW
Net weight	111 kg
Power supply	Electric
Voltage	400 V
