Cod: 116770020062974

Class A 2-door stainless steel refrigerated counter, -2 to +8 °C, 136×70×85h cm, tropicalised, energy-efficient

Description

Why buy it?

This refrigerated counter is not just a simple refrigerated unit, but a sound and long-lasting investment for your business. Thanks to its **tropicalised stainless steel** design, it combines robustness and durability even in harsh environmental conditions, whilst maintaining high standards of hygiene and cleanliness. Its **energy efficiency class A** ensures low energy consumption, helping to reduce your energy bills without compromising on performance. With a capacity of over 550 litres, it is ideal for storing large quantities of food, always at a controlled and consistent temperature.

Key features

- **Tropicalised stainless steel**
  Made entirely from stainless steel, this refrigerated counter guarantees maximum resistance to corrosion, ease of cleaning and a long service life. The tropicalised finish ensures high performance even in hot and humid environments, typical of professional kitchens.
- **Automatic door closure**
  The doors are designed to close automatically, preventing cold air from escaping and keeping the internal temperature stable at all times. This feature translates into greater efficiency and lower energy consumption.
- **1 shelf per door included**
  Each compartment is fitted with an adjustable shelf, designed to ensure food is arranged neatly and efficiently. The shelves offer maximum versatility, allowing you to make the most of the internal space.
- **Adjustable feet**
  The table's feet can be easily adjusted in height, allowing the unit to be adapted to any work surface. This feature ensures stability and convenience in any setting.
- **Adjustable temperature with electronic thermostat**
  The electronic control system allows you to set the desired temperature precisely. This ensures that food is always stored optimally, with uniform cooling guaranteed.
- **Automatic condensation evaporation**
  Thanks to the automatic evaporation system, there is no need to empty the drip trays manually. This feature simplifies maintenance and reduces the time required for daily management.
- **Electric defrost**
  Automatic defrosting prevents ice from forming on the internal walls, maintaining cooling capacity and reducing the need for manual intervention.

Technical specifications

- **External dimensions:** 136x70x85h cm
- **Packaging dimensions:** 79.9x58x56.4h cm
- **Capacity:** 282 litres
- **Power:** 0.20 kW
- **Energy efficiency class:** A
- **Refrigerant:** R290
- **Cooling system:** fan-assisted
- **Included accessories:** 2 shelves (1 per door)

Dimensions

External dimensions	1360x700x850 mm
Internal dimensions	799x580x564 mm

Packaging dimensions	1390x730x910 mm

Technical specifications

Capacity	282 Lt
Compressor	embrace
Electrical Power	0.20 kW
Electricity consumption	1.30 Kw/24h
Electricity consumption	473 Kw/anno
Energy efficiency class	A
Frequency	50 Hz
Maximum room temperature	38 °C
Net weight	109 kg
Operating temperature	-2 +8 °C
Power supply	Electric
Refrigerant gas	R290
Refrigeration	ventilated
Thermostat	dixell
Voltage	230 V
Weight including packaging	119 kg

Standard equipment

Included	2 grills (1 per door)
