Cod: 5373

Professional ventilated tunnel-type electric pizza oven for pizzerias, with an hourly output of 32 pizzas (stackable), made of stainless steel with a digital control panel

Description

Professional ventilated tunnel oven for pizzerias, with an hourly output of 32 pizzas (stackable). Made entirely from stainless steel. Ideal for cooking a variety of dishes: pizza, bread, focaccia, vegetables, deli products and much more. The tunnel oven is stackable, allowing you to double or triple productivity or to cook different dishes simultaneously without increasing the cooking area. It does not require experienced staff to operate, as there is no need to monitor the oven whilst it is in use. Compared to a standard static oven, thanks to convection cooking and the use of electrostatic relays, it offers energy savings of 30 per cent. The control panel is simple and intuitive to use; it allows you to programme the start and stop times, the conveyor belt speed, and the temperatures of the top and bottom heating elements. The external surface of the oven does not exceed 40°C. It is fitted with a door for monitoring the cooking process and provides easy access for thorough cleaning of the interior.
Stainless steel support included.

Dimensions

Dimensions including stand	500 mm
Dimensions of the support	750 mm
External dimensions	1860x1210x500 mm
Internal dimensions	500x750x100 mm
Packaging dimensions	2305x1435x790 mm

Technical specifications

Electrical Power	14.2 kW
Net weight	255 kg
Power of the auditorium heating system	8.2 kW
Power supply	Electric
Sky resistance power	5.6 kW
Temperature	320 °C
Weight including packaging	318 kg
