Cod: 5705

Electric convection oven with humidification, 4 trays, 2/3 GN

Description

Electric convection oven with humidification, for 4 2/3 GN trays. The structure and cooking chamber are made entirely from AISI 430 stainless steel. The cooking chamber, with rounded edges in accordance with safety and hygiene standards, has been designed to deliver the very best in terms of performance and practicality. It is always fitted with a non-reversing motor, with a fan specifically designed to ensure uniform heat distribution. Fitted with an internal light, and always supplied with tray supports and a GN 2/3 rack. The door opens sideways, is double-glazed, and features a ball-bearing lock and a sealing gasket: designed to ensure the oven's maximum efficiency whilst also ensuring safety when touching the external surface.

Dimensions

Distance between baking trays	70 mm
External dimensions	620x600x580 mm
Packaging dimensions	750x750x700 mm

Technical specifications

Electrical Power	3 kW
Frequency	60 Hz
Grill power	1.8 kW
Net weight	44 kg
Power supply	Electric
Voltage	230 V
Weight including packaging	50 kg
