Cod: 111890011242842

4 kW countertop gas fry top with smooth griddle, 30×60×28h cm

Description

Countertop gas fry top, smooth griddle, stainless steel body. Knobs made from thermosetting plastic.

Rapid temperature rise and heat retention are achieved thanks to a high-efficiency stabilised-flame burner, suitable for operation at high temperatures. Ignition via a spark ignition system powered by 230V single-phase electricity plus neutral.

Thick cooking surface with rounded edges and a welded, sealedsplash guard to ensure easy cleaning. The griddle is sloped and directed towards the grease drain hole, which is connected to a container situated beneath the cooking surface. Fitted as standard with a grease collection drawer.

Smooth cooking plate.

Fitted with a safety gas tap that allows the flame to be adjusted from maximum to minimum and enables the frytop to reach 300°C. Safety is ensured by a thermocouple activated by the burner flame.

Laser-cut worktop finish to ensure the worktops fit ‘end-to-end’ and are securely fixed together.

Tested with natural gas or LPG depending on the user’s requirements.

. 100% Made in Italy.

Dimensions

External dimensions	300x600x280 mm
Packaging dimensions	400x700x500 mm

Technical specifications

Electrical Power	0.10 kW
Gas Power	4 kW
Net weight	21 kg
Operating temperature	+50 +300 °C
Power supply	Gas
Weight including packaging	24 kg
