Cod: 5887

Coin trolley with sliding hooks

Description

A trolley designed for transporting quarters and cuts from the unloading area into the cold store, with direct attachment to the track via a safety clamp. Constructed from profiles suitable for heavy loads and fitted with 20 cm diameter wheels, it is particularly robust and safe, thanks in part to the hook locking system, which prevents the suspended quarters from sliding and maintains an even load distribution. It is made to measure and with a load capacity tailored to the user's requirements.

Dimensions

External dimensions	1600x700x2500 mm

Technical specifications

Net weight	400 kg
