Cod: 111900021512935

Electric countertop fry top with ribbed griddle, 6.5 kW, 40×90×25h cm

Description

Stainless steel frame. Heat-resistant thermoset plastic handles with practical screen-printed markings.

Heating is provided by tubular heating elements with stainless steel sheaths in direct contact with the cooking plate. Temperature control via a thermostat. Operating temperatures range from 90°C to 300°C. Manual-reset safety thermostat to protect against equipment malfunctions.

A single, large, thick cooking plate with a smooth finish that ensures excellent heat transfer. Welded splash guard. The groove pattern on the grooved cooking plates is designed so that they can be cleaned using the smooth scraper employed for cutting. The cooking plate is installed on the worktop at a slight angle to allow grease to drain towards the drain.

Ribbed cooking plate.

AISI 304 stainless steel worktop with rounded corners for easy cleaning. Front, side and rear panels in stainless steel.

Large opening in the hob for draining fat into a large-capacity container situated beneath the hob itself. Fitted as standard with a fat collection container.

The worktop finish is laser-cut for a ‘butt-joint’ fit and secured with edging.

Height-adjustablestainless steel legs .

. 100% Made in Italy.

Dimensions

External dimensions	400x900x250 mm

Technical specifications

Electrical Power	6.5 kW
Net weight	54 kg
Power supply	Electric
Voltage	400 V
