Cod: 5704

Gas (natural gas) convection oven with 4 trays (2/3 GN)

Description

4-tray 2/3 GN gas convection oven. The structure and cooking chamber are made entirely from AISI 430 stainless steel. The cooking chamber, with rounded edges in compliance with safety and hygiene standards, has been designed to deliver the very best in terms of performance and practicality. It is always fitted with a non-reversing motor, with a fan specifically designed to ensure uniform heat distribution. Equipped with an internal light, and always supplied with tray supports and a GN2/3 rack. The door opens sideways; it is double-glazed, with a ball-bearing closure and a sealing gasket: designed to ensure the oven's maximum efficiency whilst also ensuring safety when touching the outer surface.

Dimensions

Distance between baking trays	70 mm
External dimensions	620x645x615 mm
Packaging dimensions	700x700x760 mm

Technical specifications

Frequency	60 Hz
Gas Power	4 kW
Net weight	46 kg
Voltage	230 V
Weight including packaging	50 kg
