Cod: 994673393388

Professional horizontal static chest freezer with sliding solid door, 128×67×82h cm, 387 litres

Description

Why buy it?

This **professional chest freezer** is designed for those looking for robust, practical and reliable equipment for the refrigerated storage of food. The horizontal design allows for quick and intuitive use, whilst the sliding solid-panel door makes it easy to work even in confined spaces. It is an ideal solution both for high-turnover professional environments and for businesses requiring a spacious, energy-efficient unit, without compromising on safety and durability.

Key features

- **Reliable and uniform static refrigeration**
  The **static refrigeration** system ensures a stable temperature inside the compartment, ideal for storing packaged food and products that do not require forced ventilation. This technology reduces moisture loss and helps to preserve the organoleptic properties of food, making the chest freezer perfect for daily, continuous use.
- **Practical, space-saving solid sliding door**
  The **solid sliding door** is designed to facilitate access to the contents, even in confined spaces. The smooth sliding action allows for quick and convenient opening, improving usability during the busiest periods. Furthermore, the solid door contributes to better insulation and greater energy efficiency.
- **Precise control with an electronic thermostat**
  The **electronic thermostat** allows for accurate temperature adjustment, ranging from +2 °C to +8 °C, enabling the fridge's operation to be adapted to different storage requirements. Electronic control ensures greater reliability than mechanical systems and simplifies the day-to-day management of the equipment.
- **Durable interior with anti-corrosion treatment**
  The interior, made of **white pre-painted sheet metal with anti-corrosion treatment**, is designed to ensure high durability over time, even in professional environments subject to humidity and intensive use. The smooth surface also facilitates cleaning and sanitisation, which are essential in the food sector.
- **Key-operated lock for enhanced security**
  The inclusion of **a key-operated lock** makes this chest freezer particularly suitable for shared professional settings or those open to the public. It protects the contents from unauthorised access, enhancing control and security over food stocks.
- **Simple and effective manual defrosting**
  The **manual defrost system** allows for direct maintenance management, ensuring consistent performance over time. This solution is valued for its reliability and for reducing technical complexity, contributing to a longer service life for the appliance.

Technical specifications

- **Operating temperature:** +2 °C / +8 °C
- **Gross capacity:** 387 litres
- **Net capacity:** 327 litres
- **External dimensions:** 128x67x82h cm
- **Internal dimensions:** 114x52.7x67h cm
- **Energy consumption:** 1.37 kWh/24h
- **Power supply:** 220–240 V / 50 Hz
- **Refrigerant:** R600a

Dimensions

External dimensions	1280x670x820 mm
Insulation thickness	70 mm
Internal dimensions	1140x527x670 mm

Packaging dimensions	1340x730x910 mm

Technical specifications

Capacity	387 Lt
Defrosting	manual
Electrical Power	0.22 kW
Electricity consumption	1.37 Kw/24h
Frequency	50 Hz
Net weight	57 kg
Noise levels	44 db
Operating temperature	+2 +8 °C
Power supply	Electric
Refrigerant gas	R600A
Voltage	230 V
Weight including packaging	63 kg
