Cod: 108140023233676

4-sided ventilated glass ice-cream display cabinet, -22 / -18 °C, black, capacity 258 litres, 45×65×195h cm

Description

Why buy it

This 4-sided ventilated glass ice-cream display cabinet is designed for those who want to showcase their products whilst keeping them at the ideal storage temperature. Its vertical design, featuring an elegant black finish and large transparent panels, allows you to create an eye-catching display that is easily visible from various angles. Perfect for ice-cream parlours, cafés, patisseries and retail outlets, it combines visibility, reliability and ease of use, helping to improve product presentation and make the shopping experience more inviting.

Key features of the ventilated ice-cream display cabinet

- Panoramic display with glass on all four sides: the glass surfaces allow for optimal visibility of the products from various angles, enhancing their presentation and attracting customers' attention. A solution particularly suited to retail outlets wishing to make frozen products the centrepiece of the display area.
- No Frost ventilated refrigeration: the ventilated cooling system ensures an even distribution of cold air inside the display cabinet, helping to maintain consistent storage conditions. No Frost technology minimises ice build-up, reducing the need for manual defrosting and simplifying the day-to-day management of the unit.
- Adjustable temperature from -22 °C to -18 °C: the temperature range is designed for the storage of ice cream and frozen products, ensuring refrigeration conditions suited to display requirements. The ability to adjust the temperature allows the display cabinet's operation to be tailored to the characteristics of the products being stored.
- Electronic thermostat for precise control: the electronic control system allows the internal temperature to be managed simply and accurately. This feature facilitates the monitoring of storage conditions and ensures practical control of the unit during daily use.
- Frameless glass hinged door: the hinged door provides convenient access to the displayed products, making it easier to load and unload them. The frameless design contributes to a modern and refined aesthetic, whilst maintaining excellent visibility of the contents.
- Hot-gas defrost system: the hot-gas defrost valve facilitates the removal of ice from the refrigeration system, helping to maintain the efficiency of the refrigeration system and reduce the need for routine maintenance.
- Gross capacity of 258 litres: the display cabinet has a gross volume of 258 litres and a net capacity of 138 litres, offering ample internal space for displaying and storing products. The vertical design also makes the most of vertical space, minimising the floor footprint.
- Compact vertical design with a black finish: thanks to its dimensions of 45 x 65 x 195h cm, the display cabinet fits easily into a variety of commercial settings, even where space is limited. The black finish gives it an elegant and professional look, which blends easily with different styles of décor.
- R290 refrigerant: the refrigeration system uses R290 refrigerant, characterised by a low global warming potential (GWP). This solution combines the requirements of professional refrigeration with a greater focus on the environmental impact of the refrigerant.

Technical specifications

- External dimensions: 45 x 65 x 195h cm
- Internal dimensions: 33.4 x 42.2 x 119.8h cm
- Packaging dimensions: 51 x 71 x 208h cm.
- Gross capacity: 258 litres.
- Net capacity: 138 litres.
- Operating temperature: -22 °C to -18 °C.
- Cooling system: No Frost fan-assisted.
- Temperature control: electronic thermostat.
- Defrosting system: hot gas valve.
- Mains supply: 220–240 V / 50 Hz.
- Power consumption: 1 kW.
- Climate class: 4.
- Refrigerant: R290.

- Net weight: 162 kg.
- Gross weight: 180 kg.
- Door type: frameless glass swing door
