Cod: 5733

Rotary rack oven for 50×70 cm racks – 1 rack with 15 shelves

Description

Electric rotary oven that ensures perfectly even baking for any type of product, from the first to the last baking tray. The heat exchanger, constructed from special high-temperature-resistant refractory steels, is designed to deliver high thermal efficiency, thereby achieving maximum output with minimum energy consumption. All the components responsible for air circulation and the movement of the trolley are located at the top of the oven, which is easily accessible; consequently, all maintenance operations are significantly simplified. The high-efficiency steam generator is controlled by an automatic device and has an adjustable steam delivery time ranging from zero to 60 seconds. Both the external façade and the internal parts of the baking chamber are made entirely of stainless steel. The control panels and electrical systems comply with EC regulations and use only high-quality components. Baking area: 6.3 m². Production capacity: 83 kg/h.

Dimensions

Baking tray dimensions	500x700 mm
External dimensions	1310x1730x1900 mm

Technical specifications

Baking tray capacity	15
Electrical Power	1.6 kW
Net weight	1050 kg
Power supply	Electric
Thermal power	31.5 kW
